

Challenge

/Presentation of issues for which it is worthwhile to seek solutions outside your organization/

A proposition for companies and institutions that, in the course of their activities, encounter issues that are important to them and that require a creative solution, a new approach, or unique competence: in a word, they justify seeking a solution outside their organization.

Opening up to ideas from outside is beneficial for many reasons, and one of the most important is the exclusive access and opportunity to choose from a range of solutions - some of which may suggest a new pattern of thinking, a new perspective on how to define a problem.

We invite you to submit initial challenge proposals, which will be formally announced and presented during LSOS 2022 in the CHALLENGE session. General rules for collaboration:

- The preliminary CHALLENGE proposal is accepted in the form of an abstract on the form available on the website. Abstracts should be submitted in English.
- The details and rules of the cooperation are agreed, including the rules of the competition and the legal aspects regarding the confidentiality of information (Challenge Programme and Partner Agreement).
- Before the LSOS 2022 event: an information campaign in the Cluster media announcing the CHALLENGE is launched - the theme, the Partner and the general rules of participation are published.
- During LSOS 2022: Partner presents the context and then details the CHALLENGE as a problem he/she is interested in solving.
- After the LSOS 2022 event: the full text and terms and conditions of the Challenge are promoted in the LifeScience Kraków Cluster media, including <http://lifescienceopenspace.pl/>, according to the agreed program.
- The challenge is resolved during an official event organized by the LifeScience Kraków Cluster Foundation in cooperation with the Partner.
- The Foundation assists and mediates in the implementation of the project, including liaising between the parties, collecting proposals for solutions and ensuring the quality of relations, transparency and legal standards.
